

AI CV Builder Backend API Specification

Authentication

POST /auth/verify-email

Description:

Verify user email and issue JWT tokens.

Headers:

- Authorization: Basic <base64(admin:securepassword)>

Request Body:

```
{
  "email": "user@example.com",
  "first_name": "John",
  "last_name": "Doe",
  "phone": "1234567890"
}
```

Response:

```
{
  "access_token": "<JWT>",
  "token_type": "bearer"
}
```

POST /auth/refresh

Description:

Refresh JWT tokens.

Headers:

- Authorization: Bearer <refresh_token>

Response:

```
{
  "access_token": "<JWT>",
  "token_type": "bearer"
}
```

POST /auth/logout**Description:**

Logout and invalidate session.

Headers:

- Authorization: Bearer <access_token or refresh_token>

Response:

```
{
  "message": "Logged out successfully"
}
```

or

```
{
  "message": "Access token refreshed",
  "access_token": "<new_access_token>"
}
```

Resume

POST /resume/upload**Description:**

Upload a resume file for ATS analysis.

Headers:

- Authorization: Bearer <access_token>

Form Data:

- file : PDF, DOC, or DOCX file

Response:

```
{
  "is_resume": true,
  "score": 85.0,
  "feedback": "Your resume is well structured...",
  "strengths": ["Clear formatting", "Relevant experience"],
  "weaknesses": ["Lacks keywords"],
  "suggestions": ["Add more keywords", "Improve summary"]
}
```

If not a resume:

```
{
  "is_resume": false
}
```

GET /resume/results**Description:**

Get all ATS results for the authenticated user.

Headers:

- Authorization: Bearer <access_token>

Response:

```
[
  {
    "custHash": "user-uuid",
    "result": {
      "resume1.pdf": {
        "2024-06-01T12:00:00": 85.0
      }
    }
  }
]
```

```
}  
}  
]
```

GET /resume/scores

Description:

Get ATS scores and results for the authenticated user.

Headers:

- Authorization: Bearer <access_token>

Response:

```
{  
  "custHash": "user-uuid",  
  "results": [  
    {  
      "filename": "resume1.pdf",  
      "timestamp": {"$date": "2024-06-01T12:00:00"},  
      "score": 85.0  
    }  
  ]  
}
```

Health

GET /health

Description:

Health check endpoint.

Response:

```
{  
  "status": "ok"
```

```
}
```

Notes:

- All endpoints (except `/auth/verify-email` and `/health`) require a valid Bearer token in the `Authorization` header.
 - For file uploads, use `multipart/form-data`.
 - See [src/models/schemas.py](#) for schema details.
-
